Scenario: Founding a Company

Professor Clara Barton will be founding a start-up biotech company, SanguiLux, aimed at commercializing new technology based on research she has conducted at UCSB. One of her grad students will be working part-time at the company. The technology offers an innovative, non-invasive way to continuously monitor blood glucose levels in diabetes patients. Prof. Barton plans to take leave during AY 2019-20. Fall and winter quarters she will request leave without salary. Spring quarter she will request a full sabbatical, returning to regular service in 2020-21. The company will have a board of directors and will hire a CEO to oversee the operation. Her longer term role will be to serve on the BOD and work for SanguiLux as a consultant.

In fall and winter quarters she will spend full time on the company while in spring quarter, she anticipates spending time consulting. After the first year, she anticipates that her BOD and consulting work will require 2 days per month.
